

SHORT-RANGE TRANSIT PLAN

Fiscal Years 2008-2017

Adopted by Golden Gate Bridge, Highway and Transportation District
December 14, 2007

Federal transportation statutes require that the Metropolitan Transportation Commission (MTC), in partnership with state and local agencies, develop and periodically update a long-range Regional Transportation Plan (RTP) and a Transportation Improvement Program (TIP) that implements the RTP by programming federal funds to transportation projects contained in the RTP. In order to effectively execute these planning and programming responsibilities, MTC requires that each transit operator in its region which receives federal funding through the TIP prepare, adopt, and submit to MTC a Short-Range Transit Plan (SRTP).

The preparation of this report has been funded in part by a grant from the U.S. Department of Transportation through Section 5303 of the Federal Transit Act. The contents of this SRTP reflect the views of the Golden Gate Bridge, Highway and Transportation District (GGBHTD) and not necessarily those of the Federal Transit Administration or MTC. GGBHTD is solely responsible for the accuracy of the information presented in this SRTP.

This SRTP documents actual experience through FY 2007 (year ending June 30, 2007) and planned changes and projections for the 10-year period beginning FY 2008 and ending FY 2017.
